

Ultrasonic Cleaning Machine with Stainless Steel Tank

The ultrasonic cleaner is designed for efficient and thorough cleaning using high-frequency sound waves in a liquid medium. It features a stainless steel tank for durability and includes a control knob for adjusting cleaning time and intensity.

Product Overview

High-Efficiency Ultrasonic Cleaning Solution

This ultrasonic cleaning machine utilizes advanced high-frequency sound waves to provide thorough and efficient cleaning for a variety of delicate and precision items. Engineered with a durable stainless steel tank, the unit is built to resist corrosion and withstand demanding professional environments. The intuitive control interface allows for precise adjustments to cleaning duration and intensity, ensuring optimal results for jewelry, dental instruments, electronics, and optical components.

Technical Specifications

Tank Material	Stainless Steel
Cleaning Technology	High-frequency ultrasonic waves

Features

Adjustment Controls

Adjustable Time • Adjustable Intensity

Applications

Target Industries

- Jewelry Industry
- Dental Clinics
- Electronics Manufacturing
- Optical Laboratories
