Product Overview

Modern design with a clear digital interface and top-fill access.

Innovative Ultrasonic Humidification

This advanced ultrasonic humidifier features a global-first patented top-filling design combined with magnetic suspension technology for quiet and efficient operation. Designed for modern indoor environments, it offers both cool and warm mist functions to maintain optimal humidity levels. With intelligent sensors, integrated aromatherapy, and a user-friendly digital interface, it provides a versatile solution for home or office air quality management.

Performance & Capacity

Ultrasonic technology creates a fine, consistent mist for efficient humidification.

Coverage Area

50 j

Coverage Area

Maximum Run Time

11 hours

Key Features

Integrated aromatherapy tray for essential oil diffusion.

Key Features

Warm Mist, Cool Mist, Top Filling, Aromatherapy Tray, Magnetic Suspension, Intelligent Auto Mode

Timer Function

12 hours

Control & Operation

Mist Intensity Settings

3 levels

Control Interface

Digital display with touch button controls

Safety & Environment

7-color night light creates a relaxing atmosphere.

Safety Protections

- Automatic shut-off on low water
- Red low-water indicator
- PTC heating for bacteria inhibition

Ambient Lighting

7-color night light
