

Ultrasonic Cool Mist Humidifier

This ultrasonic humidifier efficiently atomizes water into a cool mist for increased air moisture. It features a transparent water tank to easily monitor water levels.

Overview

Combines high-efficiency humidification with aroma diffusion to purify and moisturize indoor air.

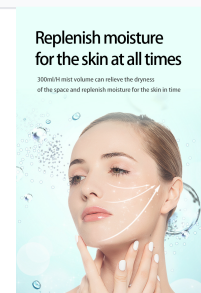

Advanced Ultrasonic Humidification

This ultrasonic cool mist humidifier is designed to improve indoor air quality while providing aromatherapy benefits. Featuring a large 5L water tank and a high-frequency atomization system, it delivers consistent moisture for up to 24 hours. With its quiet operation and intelligent controls, it is an ideal solution for maintaining a healthy and comfortable environment in homes or professional office spaces.

Key Performance

A single 5L fill provides enough moisture for a full 24 hours of operation.

300ml/H mist volume ensures rapid relief from dry air and maintains skin hydration.

Performance Highlights

5 L

Tank Capacity

300 ml/H

Technical Specifications

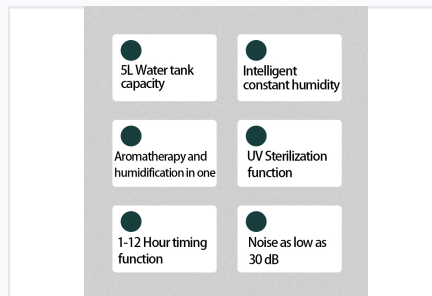

Technical Details

Parameter	Value
Model	RK-JS04
Voltage/Frequency	220V~50HZ
Power Consumption	28W
Material	ABS + PP
Product Dimensions	230 x 140 x 315 mm
Maximum Evaporation	300ml/H

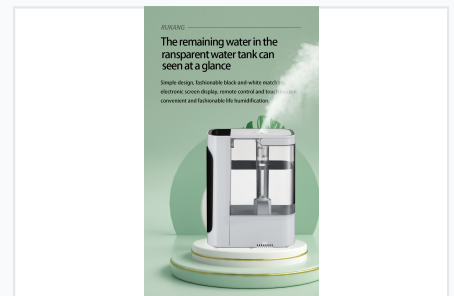

Features

Convenient top-filling design allows for easy water refills without moving the tank.

Integrated UV sterilization, aromatherapy, and intelligent humidity control.

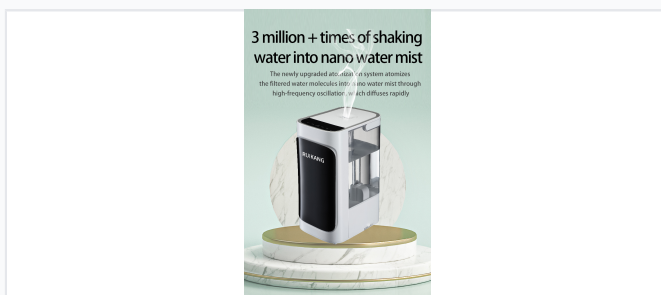

Modern aesthetic featuring a transparent tank, electronic display, and remote control support.

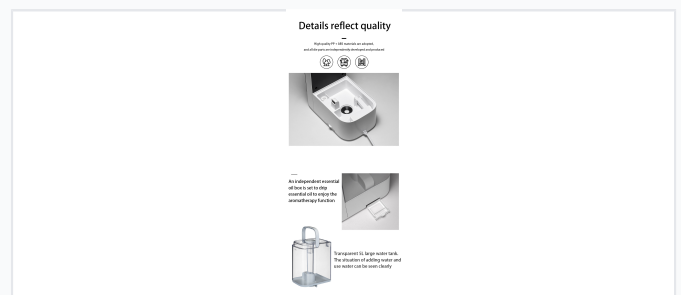

Core Features

- Intelligent constant humidity control
- UV Sterilization function
- 1-12 Hour programmable timer
- Independent aromatherapy essential oil box
- Top-filling water design
- Transparent water tank for easy monitoring
- Dual control: Remote and Touch panel

Design & Build

High-frequency oscillation converts water into fine nano-mist for better absorption.

Built with high-quality PP and ABS materials, including a dedicated essential oil tray.

Nano Water Mist

The upgraded atomization system utilizes high-frequency oscillation, shaking water over 3 million times per second to create a nano-scale water mist. This allows for rapid diffusion and effective skin hydration without leaving large droplets.

Build Quality

High-Quality PP, Durable ABS, Sleek Black-and-White Design, Compact Footprint

User Experience

Noise as low as 30 dB
Quieter than fallen leaves
The sound is smaller than the sound of fallen leaves.
It is silent all night to protect your sleep.

Ultra-quiet performance at 30dB, ensuring an undisturbed sleep environment.

Operation Time

24 Hours

Silent Operation

Yes
