Product Overview

Advanced Ultrasonic Disinfectant Humidifier

This ultrasonic humidifier is engineered for both environmental humidification and effective disinfection. Utilizing high-frequency vibrations, it generates a fine mist capable of carrying disinfectant solutions to neutralize airborne pathogens in enclosed spaces. With a generous 5-liter capacity and adjustable mist output, it offers a versatile solution for maintaining hygienic and comfortable conditions in homes and offices.

Key Features

Core Functionalities

- Disinfectant-compatible misting
- Adjustable mist output
- Dual 360-degree nozzle
- Negative ion air care
- Automatic shut-off protection

Technical Specifications

Safety Mechanisms

Auto Shut-off • Low Water Protection

Tank Capacity

5 L

Available Upgrades

Nano Silver Tank, Resin Water Filter, Warm Mist Function
