

Ultrasonic Fruit and Vegetable Cleaner

This ultrasonic fruit and vegetable cleaner uses ultrasonic technology to remove pesticides and impurities. It operates with high-frequency sound waves, creating cavitation bubbles in water to dislodge contaminants.

Product Overview

Advanced Ultrasonic Detoxification

This fruit and vegetable cleaner utilizes advanced ultrasonic technology combined with ozone purification to effectively remove pesticide residues and surface impurities. Designed for efficiency and safety, the system employs high-frequency sound waves to create cavitation bubbles that thoroughly clean produce. It offers a convenient, high-capacity solution for households and professional kitchens prioritizing food safety and healthy living.

Technical Specifications

Model	VGT-5900U
Maximum Capacity	16 L
Voltage Support	AC220V-50Hz, 110V-60Hz

Performance Metrics

Operating Performance

600 mg/h

Ozone Output

100 W

Ultrasonic Power

20 W

Ozone Power

Physical Attributes

Dimensions	425 x 340 x 350mm
Gross Weight	5.5 kg
