

Ultrasonic Spherical Humidifier

This ultrasonic humidifier increases humidity in indoor environments. It features a spherical water reservoir for easy refilling and adjustable mist output.

Product Overview

Efficient Ultrasonic Humidification

The YDH-10D is an advanced ultrasonic humidifier engineered to optimize indoor humidity levels for improved comfort. Its distinct spherical reservoir allows for effortless refilling and clear water level monitoring. Designed for versatile use, it operates quietly using high-frequency ultrasonic technology, making it an ideal solution for offices, bedrooms, and residential living spaces.

Key Features

Functional Features

- Ultrasonic mist generation
- Adjustable mist output settings
- Automatic low-water shut-off
- Easy-to-clean exterior
- Intuitive control interface

Safety and Standards

Low Water Auto-Shutoff, Quiet Operation
