

Ultrasonic Warm Mist Humidifier 6L

This ultrasonic humidifier uses high-frequency sound waves to generate a fine mist, increasing humidity levels in a room. It features a 6L capacity and provides warm mist.

Product Overview

Professional Ultrasonic Humidification

This 6L ultrasonic warm and cool mist humidifier is designed for professional and residential environments requiring precise humidity control. Equipped with a built-in humidistat and multi-functional mist settings, it efficiently maintains optimal air quality while operating quietly. Safety is prioritized through features such as automatic shut-off and low water level alarms.

Technical Specifications

Power Requirements

230 V

Voltage

50 Hz

Frequency

90 W

Power Consumption

Water Tank Capacity	6 L
Mist Output	350 ml/H

Physical Dimensions

Weight

Type	Weight
Gross Weight	3.3
Net Weight	2.5

Product Dimensions	240 x 240 x 360 mm
