

Ultrathin Robotic Vacuum Cleaner

This ultrathin robotic vacuum cleaner has a body thickness of 78mm and a diameter of 315mm. It is designed for efficient cleaning under furniture and in tight spaces.

Product Overview

Ultrathin Robotic Cleaning Solution

This robotic vacuum cleaner is engineered for efficiency and accessibility, featuring an ultra-low profile design that allows it to navigate seamlessly under furniture such as sofas, beds, and cabinets. With a compact diameter and slim body, it provides thorough cleaning in tight spaces that are often difficult to reach. It is an ideal solution for maintaining clean floors with minimal manual effort.
