

Under Sink Water Filter Purifier with UV Sterilizer

This under sink water filter features a two-stage filtration system and UV light for purifying water. It utilizes PP+CTO cartridges and is designed for wall mounting.

Product Overview

Professional Under-Sink Filtration System

This advanced under-sink water filtration system combines two-stage physical filtration with powerful UV sterilization technology. Designed to remove particulate matter and chlorine, it effectively improves water quality while eliminating harmful bacteria and viruses. The compact design allows for convenient installation in professional or domestic environments, ensuring a reliable source of purified drinking water.

Technical Specifications

Operating Pressure Range

8 PSI

Minimum Pressure

125 PSI

Maximum Pressure

Filtration Type	Two-stage, PP Filter, CTO Carbon Filter
Density Capacity	8.8 kg/m ³

Service Options

Customization	Yes
