

Underbone Motorcycle with Step-Through Frame

This is an underbone motorcycle, also known as a 'cub' style bike, characterized by its step-through frame. It features a single-cylinder engine, chrome accents, and essential components.

Overview

Versatile Underbone Design

This underbone motorcycle features a classic step-through frame, engineered for agility and ease of use in urban environments. Its single-cylinder engine provides reliable performance, while the durable construction ensures longevity for daily commuting. With its distinctive maroon finish and chrome accents, it combines functional utility with a professional aesthetic.
