Product Overview

Dual-Function Automotive Maintenance Solution

This bundle provides essential maintenance solutions for vehicle longevity and reliability. It includes a high-performance undercarriage rustproof system designed to create a durable, waterproof barrier against moisture, salt, and environmental contaminants. Additionally, the included starting fluid aids in the ignition of internal combustion engines, making it an indispensable tool for cold weather starts and challenging operational conditions.

Technical Specifications

Net Weight	450 g
Formula Type	Waterborne

Application & Usage

Key Benefits

- Corrosion protection for undercarriages
- Waterproof barrier against salt and moisture
- Facilitates engine starting in cold weather
- Extends lifespan of automotive components

Primary Applications	Automotive, Agricultural, Industrial
----------------------	--------------------------------------

Safety & Handling

Flammability Warning

The engine starting fluid contains a mixture of highly volatile and flammable substances, including ether, heptane, and propane. Exercise caution during application and store according to standard safety protocols for flammable aerosols.
