

# Underwater and Landscape LED Spotlight

High-intensity LED spotlight designed for underwater or landscape applications. It features a robust, corrosion-resistant housing and an adjustable mounting bracket for precise aiming.

## Product Overview

### High-Performance Versatile Illumination

This high-intensity LED spotlight is engineered for both underwater and landscape environments, offering exceptional flexibility for various design needs. Constructed with a robust, corrosion-resistant housing, the unit ensures longevity and reliability in demanding weather or submerged conditions. The integration of three high-output LEDs provides bright, focused light perfect for architectural accents, water features, or site landscape lighting.

## Technical Specifications

LED Count	3
Application Compatibility	Underwater, Landscape, Architectural, Water Feature

## Design & Build

Construction Material	Corrosion-resistant metal alloy
Mounting Options	Adjustable mounting bracket for precise aiming
