

Underwater and Outdoor LED Amphibious Light

This amphibious light is designed for both underwater and outdoor use, featuring a durable, rock-like housing. The light source is a high-intensity LED, providing bright and efficient illumination for various landscape applications.

Overview

Versatile Amphibious Lighting

This amphibious LED light is engineered for both underwater and outdoor environments, featuring a durable, rock-like housing that integrates seamlessly into natural landscapes. Its high-intensity LED source delivers efficient, bright illumination suitable for ponds, gardens, and various outdoor settings. With a rugged, waterproof design, this fixture offers long-lasting durability and reliability in wet conditions while remaining easy to install and maintain.

Key Features

Applications

Underwater, Ponds, Gardens, Landscape Lighting, Outdoor

Technical Specifications

Weather Resistance

Waterproof • Impact Resistant

Design Features

- Rock-like housing for natural blending
- Integrated lens for focused beam projection
- Compact form factor
- Energy efficient operation

Light Source

High-intensity LED
