

Underwater Brass Spotlight with Adjustable Bracket

This underwater spotlight features a solid brass construction, ensuring durability and resistance to corrosion in aquatic environments. The adjustable bracket allows for precise directional lighting and the grill protects the bulb from debris and impact.

Product Overview

Professional Underwater Lighting Solution

This high-quality underwater spotlight is engineered with solid brass construction, ensuring exceptional durability and corrosion resistance in demanding aquatic environments. Designed specifically for submersible applications, it is an ideal choice for illuminating ponds, fountains, and various water features. The integrated adjustable bracket allows for precise directional lighting, while the protective grill safeguards the bulb against debris and impact.

Construction & Design

Material	Solid Brass
Protection Features	Corrosion Resistant, Impact Resistant Grill, Submersible

Installation & Usage

Recommended Applications

- Ponds
- Fountains
- Underwater Features

Mounting	Adjustable Bracket
