Product Overview

High-Performance Marine Illumination

This underwater LED boat light is engineered with high-power LEDs and a 316L stainless steel shell for superior corrosion resistance in marine environments. Designed for yachts, docks, and pools, it offers high luminous efficiency with a lifespan exceeding 50,000 hours. The IP68 waterproof rating ensures reliable performance for underwater applications, providing both aesthetic appeal and enhanced safety for nighttime navigation.

Technical Specifications

30-degree beam angle for focused and efficient light penetration in water.

Available Power

- 18W (6x3W)
- 30W (6x5W)
- 60W (6x10W)

Supply Voltage

DC 10-30V (Single Color) / DC 12V or 24V (RGB/RGBW)

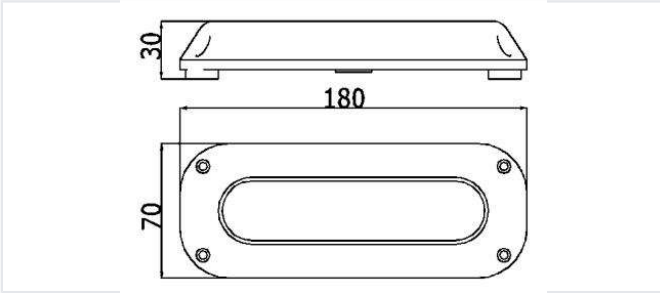

Emitting Angle

30 °

LED Chip Type

Bridgelux, CREE

Design & Build

Dimensional specifications: 180mm length, 70mm width, and 30mm height.

Durable 316L stainless steel housing designed for permanent submersion.

Waterproof Grade

IP68

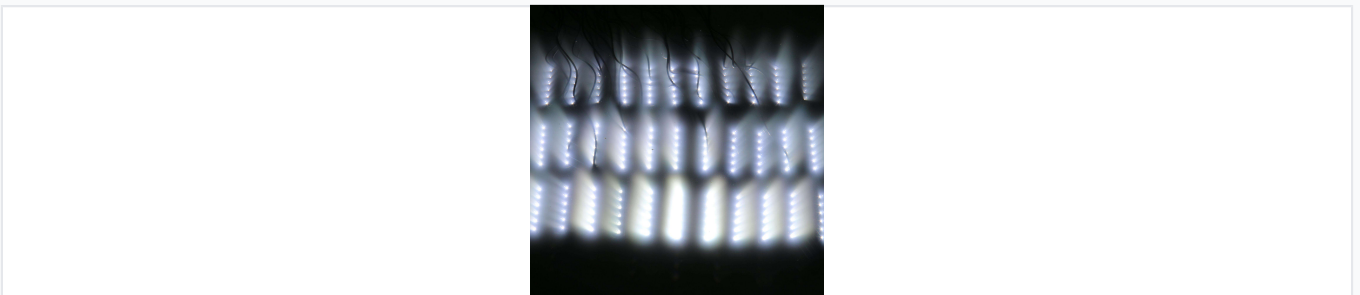

Physical Dimensions

Dimension	Value
Length	180mm
Width	70mm
Height	30mm

Housing Material

316L Stainless Steel

Performance

High-intensity output available in various colors including blue, white, and RGB.

Performance Highlights

50000 Hours

Lifespan

30 °

Beam Angle

Key Features

- High luminous efficiency
- Low electric consumption
- Shake-proof and rust-proof
- Built-in Driver
- Environment-friendly design

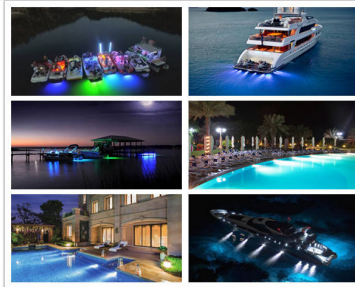

Available Emitting Colors

White, Red, Green, Blue, RGB, RGBW

Applications

Wall-mounted installation ideal for boat transoms and hulls.

Enhance nighttime aesthetics and safety with powerful underwater lighting.

Recommended Applications

- Yacht and Boat hulls
- Docks and Marinas
- Swimming pools and Ponds
- Fountains
- Nighttime marine life observation
