

Uninterruptible Power Supply for Electronics

This uninterruptible power supply provides backup power during outages. It protects sensitive electronic equipment from damage due to power surges and voltage variations.

Product Overview

Uninterruptible Power Supply for Electronics

This uninterruptible power supply is designed to provide reliable backup power for sensitive electronic equipment, protecting against surges, spikes, and brownouts. With efficient conversion and a rapid transit time of less than 10 milliseconds, it ensures a safe and stable power transition during outages. Its compact design is ideal for home and small office setups, providing essential protection for computers and peripherals.

Performance Specifications

Transit Time	10 msec
Efficiency	High efficient conversion

Features & Protection

Indicator Lights

- Power On
- Battery Status
- Overload Condition

Key Features	Surge Protection, Battery Backup, Overload Protection, Compact Design
