

Uninterruptible Power Supply (UPS)

This uninterruptible power supply (UPS) provides reliable backup power and protects electronic equipment from power issues. It features an LCD display for monitoring and advanced battery management for optimal performance.

Product Overview

Reliable Power Protection

This high-performance uninterruptible power supply (UPS) provides robust backup power to protect sensitive electronic equipment from power outages, voltage fluctuations, and surges. Featuring an integrated LCD display, it enables real-time monitoring of input and output voltage, battery status, and load levels. Designed for efficiency, the unit utilizes advanced battery management technology to maximize battery lifespan and optimize recharge cycles.

Monitoring and Control

Interface Controls

- Power ON/OFF
- Navigation (Up/Down/Enter)
- Low Battery Indicator

Monitoring Interface

LCD Display, Input Voltage Monitoring, Output Voltage Monitoring, Battery Status Tracking, Load Level Indication

Application

Ideal Applications

Home • Office • Small Business
