

Uninterruptible Power Supply (UPS)

This uninterruptible power supply (UPS) offers backup power to protect equipment during outages. Equipped with a control panel and wheels, it's suitable for data centers and server rooms.

Product Overview

High-Capacity Backup Power Solution

This floor-standing uninterruptible power supply (UPS) is engineered to provide reliable backup power for mission-critical operations. Designed for environments like data centers and server rooms, it safeguards sensitive electronic equipment from unexpected outages. The unit features an integrated control panel for real-time monitoring and includes built-in wheels to ensure easy mobility and installation in professional settings.

Technical Specifications

Form Factor	Floor-standing
Mobility	Yes
Interface	Digital control panel with display screen

Application

Suitable Environments	Data Centers, Server Rooms, Critical Infrastructure
