

Uninterruptible Power Supply (UPS) Unit with Display Screen

This standalone UPS unit provides backup power during outages. It features a user interface with a display and control buttons, all within a ventilated enclosure.

Product Overview

Reliable Power Protection

This Uninterruptible Power Supply (UPS) provides a robust backup power solution to safeguard sensitive electronic equipment against outages and voltage irregularities. Featuring an integrated display screen and tactile control buttons, it allows for easy monitoring and management of power status. The unit is housed in a professional-grade, ventilated enclosure optimized for efficient thermal management during operation.

Technical Features

Interface	Built-in digital display screen with tactile control buttons
Thermal Management	Ventilated Enclosure, Active Thermal Management

Application

Best For

- Sensitive electronic equipment
- Data protection
- Voltage fluctuation mitigation
- Emergency power backup
