

Uninterruptible Power Supply (UPS) Unit with Display Screen

This compact UPS unit ensures continuous power to connected devices during power disruptions. It is equipped with a display screen for real-time status monitoring and multiple output connections for versatile use.

Product Overview

Professional UPS Solution

This uninterruptible power supply (UPS) unit is engineered to provide reliable backup power and surge protection for sensitive electronic infrastructure. It features an integrated display screen for real-time monitoring of status and power conditions, ensuring operational continuity during outages. Designed with a robust enclosure and multiple output connections, it is a versatile choice for protecting critical hardware from electrical instability.

Technical Specifications

Core Features	Backup Power, Surge Protection, Display Screen, Robust Enclosure
Monitoring	Yes
Connectivity Type	Multiple output connections
