

Uninterruptible Power Supply with Surge Protection

This uninterruptible power supply offers battery backup and surge protection for computers and networking devices. It stabilizes voltage fluctuations and prevents data loss during power outages, suitable for home and office use.

Overview

Reliable Power Protection

This uninterruptible power supply (UPS) is designed to provide highly reliable, battery-powered backup for sensitive electronic equipment during electricity failures. It offers comprehensive protection against lightning and power surges, effectively extending the lifespan of your hardware. With integrated intelligent management features, the system ensures data safety by automatically shutting down connected devices when necessary.

Key Features

Automated Functions

- Automatic safety shutdown
- Data preservation during power loss
- Voltage fluctuation stabilization

Protection Capabilities

Battery Backup, Surge Protection, Lightning Protection, Intelligent Power Management

Performance

Performance Metrics

650 VA

Model Capacity
