

Uninterruptible Power Supply with Voltage Regulation

This uninterruptible power supply offers reliable backup power during electrical outages. It regulates voltage, protecting sensitive equipment from fluctuations and surges.

Overview

Professional Power Protection

This Uninterruptible Power Supply (UPS) is engineered to provide reliable backup power and robust voltage regulation for sensitive electronic equipment. Featuring a durable metallic enclosure and active ventilation, it effectively guards against power surges and unexpected outages. It is an essential solution for ensuring operational continuity and protecting valuable hardware from electrical instability.

Key Features

Protection Capabilities

Voltage Regulation, Surge Protection, Power Backup

Design and Build

Available Color Finishes

- Huzhou Blue
- Grass Green
- Pearl White
- Orange Red
- Tangerine
- Bright Red
- Gem Blue

Housing

Metallic enclosure with integrated ventilation grills

Technical Specifications

Front Panel Indicators

Yes
