

Uninterruptible Power Supply

This uninterruptible power supply provides backup power during outages. It ensures continuous operation, preventing data loss and equipment damage.

Product Overview

Reliable Power Protection

This Uninterruptible Power Supply (UPS) provides critical backup power in the event of an unexpected utility power outage. Designed to safeguard sensitive equipment, the unit ensures continuous operation to prevent costly data loss and hardware damage. Integrated features include battery backup, advanced surge protection, and stable voltage regulation to maintain system integrity.

Applications

Data Protection, Power Conditioning, Continuous Operation, Hardware Safety

Key Features

Capabilities

- Battery Backup support
- Advanced Surge Protection
- Voltage Regulation
- Preventative Data Loss protection
- Equipment Damage mitigation
