Product Overview

High-Performance Universal AC Motor

This versatile Universal AC Motor is engineered for demanding industrial and consumer applications, including paper shredders, mixers, blenders, and juicers. Designed for flexibility, it features customizable mechanical parameters such as shaft dimensions, stator height, and mounting configurations to meet specific project requirements. Its robust construction ensures reliable energy conversion and high performance across various machinery integration needs.

Mechanical Specifications

Available Shaft Diameters

- 4.5mm
- 5mm
- 6.35mm

Stator Height Range	10mm to 40mm
Bracket Material Options	Metal, Aluminum
Rotation Direction	CW, CCW

Applications

Typical Applications

- Paper Shredders
- Mixers
- Blenders
- Juicers

Customization

Customization Capabilities

- Custom shaft length
- Adjustable mounting hole size and distance
- Adjustable bracket height
- Customizable electrical performance
