Product Overview

Universal Electrical Connectivity

This universal AC power socket is engineered for versatile electrical connectivity, supporting multiple plug standards to ensure seamless performance across diverse regions. Constructed with high-quality components including a flame-retardant nylon cover and silver contacts, it offers reliable durability for both residential and commercial environments. The integrated switch and indicator light provide enhanced safety and convenient control over power distribution.

Technical Construction

Material Composition

- Bakelite panel
- PC base
- Copper sheet
- Silver contact
- Screw iron
- Flame retardant nylon cover sheet
