Overview

Universal Air Hose Coupling with Locking Cam

This universal air hose coupling is designed for secure and efficient connections in pneumatic systems and air tool applications. Constructed from durable galvanized steel, it features a locking cam mechanism and a universal claw design for rapid connection and disconnection. Each unit is equipped with a high-quality rubber gasket or O-ring to ensure an airtight seal and prevent pressure loss during operation.

Technical Specifications

Available Sizes

- 3/8 inch
- 1/2 inch
- 3/4 inch
- 1 inch

Connection Types

Standard	Fitting Types
USA Type	Female, Male, Hose End
European Type	Female, Male, Hose End

Design & Construction

Material

Galvanized Steel • Durable Metal

Key Features

- Locking cam mechanism for secure connection
- Universal claw design
- Ribbed hose barb for secure attachment
- Stamped size markings (e.g., 3/4)

Sealing Mechanism

Rubber Gasket, Black Rubber O-ring, Airtight Seal

Applications

Pneumatic Applications

Pneumatic Systems, Air Tools, Air Compressors
