Product Overview

Versatile Transport Solution

These universal aluminum roof bars are engineered for durability and ease of use, providing a secure platform for roof boxes, bike carriers, and luggage. Featuring an aerodynamic profile, they significantly reduce drag and wind noise during transit. The system includes integrated locking mechanisms to prevent theft, ensuring peace of mind for professional and recreational transport needs.

Technical Specifications

Material	Aluminum alloy and ABS plastic
Length	120 cm

Performance

Load Capacity

90 kg

Max Load Capacity

Compatibility

Compatible Rail Gap	Less than or equal to 120 cm
---------------------	------------------------------

Features

Key Features	Aerodynamic Profile, Lockable, Lightweight, Easy Installation, Theft Prevention
--------------	---

Installation

Installation Notes

- Universal fit for vehicles with existing roof rails
- Ready to use out of the box
- Includes all necessary mounting hardware and instructions
- Please verify vehicle rail gap before ordering
