

# Universal Battery Charger for AA and AAA Ni-CD and Ni-MH Batteries

This universal battery charger is designed for charging AA and AAA Ni-CD and Ni-MH batteries. It includes overcharge protection and LED charging indicators.

## Overview

### Universal Charging Solution

This universal battery charger is designed to efficiently power both AA and AAA Ni-CD and Ni-MH rechargeable batteries. Engineered for reliability and safety, it includes built-in overcharge protection and clear LED status indicators to monitor your charging process. Its compact, lightweight form factor makes it an ideal solution for professional environments requiring portable and consistent battery maintenance.

## Technical Specifications

### Output Current

**400 mA**  
AA Output

**150 mA**  
AAA Output

Input Voltage	100-240V AC, 50/60Hz
Output Voltage	1.4 V DC

## Features

### Safety & Indicators

- Overcharge protection
- LED charging status indicators

Supported Battery Types	AA, AAA, Ni-CD, Ni-MH
-------------------------	-----------------------

## Design

### Design Attributes

Compact • Portable
