

Universal Blender Motor

This universal motor is designed for coffee blenders. It features a laminated stator core with copper windings and a commutator.

Product Overview

Versatile Universal Motor

This high-performance universal motor is engineered for reliability in a variety of small kitchen appliances. Featuring a robust design with a laminated stator core and high-quality copper windings, it ensures consistent operation for demanding tasks. It is an ideal component for manufacturers looking to equip blenders, mixers, juicers, and food processors with a dependable power source.

Technical Specifications

Motor Type	AC/DC Universal Motor
Construction Materials	Copper Windings, Laminated Stator Core, Metal Housing

Compatibility & Applications

Compatible Appliances

- Blenders
- Mixers
- Juicers
- Coffee Blenders
- Food Processors

Design Features

Design Highlights

Commutator Equipped • Terminal Block Connections • Blade Attachment Shaft
