

Universal Cutting Tool Grinder

This universal tool grinder is designed for sharpening various cutting tools used in woodworking and metalworking. It features adjustable grinding wheel speed, precision alignment capabilities, and a coolant system for optimal performance.

Product Overview

Universal Cutting Tool Grinder

The Universal Cutting Tool Grinder is a versatile and robust solution designed for precision sharpening of diverse tools used in both woodworking and metalworking. Built with a rigid frame for maximum stability, this machine ensures high-accuracy results during every operation. It is an essential asset for workshops requiring consistent maintenance of drill bits, end mills, lathe tools, and other cutting equipment.

Technical Specifications

Model ID	MF2760
Compatible Tooling	Drill Bits, End Mills, Lathe Tools

Performance Features

Core Features

- Adjustable grinding wheel speed
- Precision alignment capabilities
- Integrated coolant system
- Rigid frame construction for enhanced stability
