

Universal Milling and Drilling Machine

This universal milling and drilling machine is designed for versatile machining operations. It features a vertical milling head and coordinate table for multi-axis machining.

Overview

Versatile Machining Capability

The Universal Milling and Drilling Machine model XZ6350ZB is designed to provide high precision and stability for a variety of machining operations. This robust machine features a vertical milling head and a coordinate table, making it an excellent choice for multi-axis machining tasks. It is well-suited for professional tool rooms, workshops, and general manufacturing environments requiring reliable drilling, milling, and tapping performance.
