

Universal Motor for Blenders, Coffee Makers, and Juicers

This universal motor is designed for blenders, coffee makers, and juicers. It features a robust construction with a durable aluminum housing for efficient heat dissipation and long-lasting performance.

Overview

High-Performance Universal Motor

This universal motor is precision-engineered for versatility, serving as an ideal power source for blenders, coffee makers, and juicers. Designed with a robust aluminum housing, it ensures efficient heat dissipation and long-term durability under demanding kitchen conditions. Its high-torque capability and consistent speed output make it a reliable choice for various household food processing appliances.

Technical Specifications

Motor Type	Universal Motor
Housing Material	Aluminum
Compatible Appliances	Blenders, Coffee Makers, Juicers

Performance Metrics

Key Performance Attributes

- High torque output
- Consistent operational speed
- Efficient heat dissipation
