Product Overview

Universal Motor for Food Slicers

This high-performance universal motor is engineered specifically for food slicing applications, offering a reliable balance of speed and torque. It features durable copper windings for efficient power transfer and a specialized geared output shaft for enhanced torque amplification. Its compact construction and integrated mounting points facilitate seamless integration into a wide variety of professional and household kitchen slicer models.

Technical Specifications

Internal Components

- High-speed armature
- Copper windings
- Durable gearbox with plastic gears
- Integrated brushes

Key Performance Metrics

1 Geared

Torque Amplification

Wiring Specifications

20AWG

Compatibility

Intended Use

Kitchen Slicers • Food Processing • Household Appliances
