

# Universal Motor for Kitchen Appliances

Universal motor designed for blenders, juicers, mixers, food processors, and choppers. Features include a copper winding for efficient operation and a robust metal frame for durability.

## Product Overview

### Universal Motor for Kitchen Appliances

This versatile AC/DC universal motor is engineered for high-performance kitchen and household equipment. Designed with durability and efficiency in mind, it features robust construction suitable for demanding applications like commercial blenders, meat grinders, and food processors. With customizable power and speed options, it integrates seamlessly into various appliance designs to ensure reliable operation.

## Electrical Specifications

Voltage Range	110V - 240V
Frequency	50/60Hz
Insulation Class	B, E, F, H

## Performance Metrics

### Customizable Performance

**0 Watts (Customizable)**  
Power Output

**0 RPM (Customizable)**  
Speed

### Protection Features

- Thermal fuse devices
- Optional reset function

## Applications

### Typical Applications

Blender • Juicer • Mixer • Grinder • Food Processor • Stand Blender • Commercial Blender • Cutters • Power Tools
