

# Universal Motorcycle Exhaust Muffler with Carbon Fiber Body

This universal motorcycle exhaust muffler features a carbon fiber body with CNC-machined components. It is designed to reduce noise and enhance performance.

## ADDITIONAL IMAGES

## Product Overview

High-quality universal exhaust featuring a carbon fiber body and CNC-machined end cap for motocross applications.

## Universal High-Performance Exhaust

This universal motorcycle exhaust muffler is engineered for motocross and enduro dirt bikes, featuring a premium carbon fiber body and CNC-machined components. It provides a significant upgrade to your exhaust system by delivering a deep, resonant sound while maintaining effective noise reduction. The lightweight construction and high-quality materials ensure durability and enhanced performance for professional racing or off-road use.

Model Reference

BM032CC-02

## Technical Dimensions

Detailed dimensions showing the 51mm inlet and 105mm outlet configuration.

### Key Dimensions

**290 mm**

Overall Length

**51 mm**

Inlet Diameter

**105 mm**

Outlet Diameter

Body Diameter

200 mm

## Construction & Materials

Materials

Carbon Fiber, CNC Machined Aluminum, Stainless Steel

Finish Type

Carbon fiber body with CNC-machined end cap

## Application

### Compatible Categories

- Motocross
- Enduro
- Dirt Bike
- Universal Fitment

### Performance Features

- Effective noise reduction
- Enhanced exhaust flow
- Deep resonant exhaust note
- High durability for off-road conditions
