

Universal Pulse Start Metal Halide Lamp

Universal pulse start metal halide lamps are high-intensity discharge (HID) lamps. These lamps are commonly used in street lighting, industrial lighting, and other applications where high light output and long lifespan are required.

Product Overview

High-Efficiency HID Lighting

The Universal Pulse Start Metal Halide Lamp provides high-intensity discharge illumination by utilizing a specialized mixture of metal halides and mercury vapor. Engineered for professional applications, these lamps deliver exceptional light output combined with superior energy efficiency and a long operational lifespan. They represent a robust solution for environments requiring consistent, reliable lighting performance.

Technical Specifications

Technology Type	Pulse Start Metal Halide (HID)
Design Standard	Euro.TPS

Applications

Primary Applications	Street Lighting, Industrial Lighting, Outdoor Utility
----------------------	---

Performance Features

Core Advantages

- High luminous efficiency
- Extended service life
- Excellent color rendering
- Optimized for pulse start systems
