Product Overview

Universal Roof Rack Solution

This universal roof rack mounting system is expertly engineered for vehicles equipped with raised side rails. Featuring a robust, high-strength steel construction and an aerodynamic profile, it effectively minimizes wind noise while providing a reliable platform for transporting luggage and sporting equipment. With integrated locking mechanisms and easy installation, it offers both security and convenience for various transit needs.

Technical Specifications

Compatibility	Raised Side Rails, Universal Fit
Material	High-strength steel
Finish	Durable Black

Key Features

Key Features

- Aerodynamic profile reduces wind noise
- Integrated security locking mechanism
- Weather-resistant construction
- Quick installation and removal system

Security Features

Integrated Locks • Weatherproof • High Load Capacity
