

University Library Architectural Design

Architectural design services for a university library project. The design features a multi-story building with glass facades and a focus on natural lighting.

Project Overview

University Library Architectural Design

This architectural project represents a modern, multi-story library facility designed specifically for the University of Kenya. The design prioritizes natural lighting through extensive glass facades and a contemporary aesthetic, featuring a prominent curved glass section and integrated green spaces. It offers a sophisticated learning environment that combines structural elegance with functional pedestrian accessibility.

Project Type

Educational • Institutional • Architectural Design

Design Features

Key Structural Elements

- Multi-story structure
- Extensive glass facades
- Curved glass architectural section
- Covered entrance area
- Integrated green spaces

Lighting Strategy

Maximization of natural daylighting
