

Unshielded Twisted Pair Backbone Cable

Unshielded twisted pair cable designed for backbone applications. It is available in configurations ranging from 2 to 100 pairs.

Product Overview

Reliable Backbone Connectivity

This unshielded twisted pair backbone cable is engineered for robust data transmission in internal wiring and structured cabling systems. Featuring multiple twisted pairs, it ensures reliable connectivity for diverse networking requirements. The cable is designed for ease of use, incorporating color-coded wires to streamline identification and termination processes.

Technical Specifications

Pair Configurations

- 2 Pairs
- 100 Pairs
- Variable configurations available

Cable Type

Unshielded Twisted Pair • Backbone Cable

Primary Applications

Internal Wiring, Backbone Applications, Structured Cabling

Installation Features

Color-coded wires for simplified identification and termination
