

Unshielded Twisted Pair Communication Cable

This unshielded twisted pair (UTP) cable is designed for high-speed data transmission. It is commonly used for Ethernet connections in homes, offices, and data centers.

Product Overview

High-Performance Networking Solution

This Unshielded Twisted Pair (UTP) communication cable is engineered for reliable high-speed data transmission across various networking environments. Featuring multiple twisted pairs of insulated copper wires, it effectively minimizes electromagnetic interference for stable connectivity. It serves as a versatile solution for Ethernet connections in residential, commercial, and data center applications.

Technical Specifications

Outer Jacket Color

Gray

Cable Type

Unshielded Twisted Pair (UTP)

Conductor Material

Insulated Copper

Applications

Common Applications

- Ethernet networking
- Home office setups
- Corporate office infrastructure
- Data center cabling

Key Features

Performance Highlights

High

Data Transmission Speed

Design Advantages

Twisted Pair Design, Reduced Interference, High-Speed Data, Networking Ready
