

Unshielded Twisted Pair Computer Cable

This is an unshielded twisted pair (UTP) cable with eight color-coded conductors. The cable has a black outer jacket and contains four twisted pairs and a bare grounding wire.

Product Overview

High-Performance UTP Networking Cable

This unshielded twisted pair (UTP) computer cable is designed for reliable data transmission in professional networking environments. It features eight color-coded conductors organized into four distinct twisted pairs, ensuring reduced crosstalk and interference. With a durable black outer jacket and an integrated grounding wire, this cable is built for stable performance and longevity in various installation settings.
