

Unshielded Twisted Pair Data Cable

This unshielded twisted pair (UTP) cable is designed for data transmission in networking applications. It features four twisted pairs of conductors with color-coded insulation and a protective outer jacket.

Overview

High-Performance Data Transmission

This Unshielded Twisted Pair (UTP) cable is engineered for reliable data transmission in professional networking environments. Featuring four twisted pairs of solid conductors with precise color-coded insulation, it ensures signal integrity and correct polarity throughout the network. The durable outer jacket is designed to protect internal components from physical damage and environmental factors, making it a robust solution for various networking protocols.

Technical Specifications

Shielding

Unshielded

Conductor Configuration

4 Twisted Pairs

Conductor Type

Solid

Insulation

Color-coded

Features

Key Benefits

- Reliable data signal integrity
- Solid conductor construction
- Environmental protection jacket
- Standardized color-coding
