

Unshielded Twisted Pair UTP Cable

This unshielded twisted pair (UTP) cable consists of multiple twisted wire pairs for data transmission. It is commonly used in networking applications and features color-coded wires to reduce electromagnetic interference, with a jacket providing protection and insulation.

Product Overview

Unshielded Twisted Pair (UTP) Cable

This Unshielded Twisted Pair (UTP) cable is engineered for reliable data transmission in professional networking environments. Featuring color-coded twisted wire pairs, the design effectively minimizes electromagnetic interference to ensure signal integrity. Encased in a protective jacket, this cable provides essential insulation and durability for various indoor networking applications.

Technical Specifications

Construction Features

- Color-coded twisted wire pairs
- Protective outer jacket
- Internal insulation

Cable Type	Unshielded Twisted Pair (UTP)
------------	-------------------------------

Application & Usage

Performance Benefits

Reduced EMI • Signal Integrity • Durable Insulation

Intended Use	Networking, Data Transmission, Indoor Installations
