

Unshielded Twisted Pair UTP Cable for Data Transmission

This unshielded twisted pair (UTP) cable is designed for data transmission in computer networks. It features four twisted pairs of solid conductor wires, each with distinct color coding for easy identification and termination.

Product Overview

High-Performance Data Transmission

This unshielded twisted pair (UTP) cable is engineered for reliable data transmission in modern computer networks. Featuring four twisted pairs of solid conductor wires with clear color-coding, it ensures efficient identification and termination during installation. The durable PVC jacket provides a balance of flexibility and protection, making it an ideal choice for Ethernet applications requiring consistent high-speed data transfer.

Technical Specifications

Cable Type	Unshielded Twisted Pair (UTP)
Conductor Configuration	4 pairs
Conductor Type	Solid
Jacket Material	PVC
Suitable Applications	Ethernet, Computer Networks, Data Transmission

Features

Installation Benefits

- Color-coded wiring for easy identification
- Flexible design for simplified termination
- Durable construction for reliable performance
