

Upright Steam Mop for Hard Floors

This steam mop is designed for cleaning floors using steam. It features an upright design with a handle and a cleaning head, along with a water tank for steam generation.

Product Overview

Professional Steam Cleaning Performance

The JJB-307 upright steam mop is a versatile cleaning solution designed specifically for hard floor surfaces. Featuring a transparent removable tank and adjustable steam output, it provides consistent cleaning power for professional or household environments. The lightweight construction ensures high maneuverability during operation, while its rapid heating capability minimizes downtime.
