

Upright Vacuum Cleaner with Cyclonic Filtration

This upright vacuum cleaner features a cyclonic filtration system and a transparent dustbin. Its design allows for multi-surface cleaning with adjustable height settings and includes onboard tools.

Product Overview

Professional Cleaning Performance

The VC9810 is a high-performance upright vacuum cleaner engineered for efficiency across multiple floor surfaces. Featuring an advanced cyclonic filtration system, it ensures consistent suction power and effective dust separation. Its ergonomic design and motorized brush head provide superior maneuverability and deep cleaning capabilities for professional environments.
