

# UPVC Pipe Double Socket Bend 11.25 Degree

This double socket bend connects UPVC pipes at an 11.25-degree angle. It is made from durable UPVC, offering excellent resistance to corrosion and chemical degradation.

## Product Overview

### Durable UPVC Pipe Fitting

This double socket bend is specifically designed for connecting UPVC pipes at a precise 11.25-degree angle. Constructed from high-quality UPVC material, it offers excellent resistance to corrosion and chemical degradation, ensuring long-term reliability in various environments. The socket-end design facilitates easy and secure pipe insertion, resulting in a leak-proof joint suitable for plumbing and drainage applications.

## Technical Specifications

### Bend Angle

**11.25 °**

Degree of Bend

### Connection Type

Double Socket

## Material Properties

### Material

UPVC (Unplasticized Polyvinyl Chloride)

### Resistance Features

Corrosion Resistant, Chemical Resistant, Durable

## Installation & Application

### Joint Type

Leak-Proof • Secure Insertion

### Primary Applications

- Plumbing Systems
- Drainage Networks
- Industrial Piping
