

Urban Commuter Motorcycle with Step-Through Frame

This step-through motorcycle is ideal for urban commuting and light transport. It features a front basket, a rear carrier rack, and a step-through frame for easy access.

Product Overview

Designed for Urban Mobility

This step-through motorcycle is engineered for efficient urban commuting and light transportation tasks. It features an ergonomic frame for easy mounting and a reliable single-cylinder engine optimized for fuel economy. Equipped with both front and rear racks, it provides practical storage for daily needs and comfortable seating for both rider and passenger.
