Overview

Designed for Efficient Urban Logistics

This electric motorcycle is engineered specifically for urban delivery and professional logistics, combining robust performance with eco-friendly operation. It features a high-speed motor and portable lithium battery system, ensuring reliable daily operations with minimal downtime. With dedicated cargo solutions and safety-focused braking, it provides a practical and efficient transportation tool for fast-paced city environments.

Performance

3000W SUNRA high speed motor
Shorten delivery time which is the life of delivery service

High-performance motor built for efficiency and shortened delivery times.

Motor Power

3500 W
Motor Power

Maximum Speed

70 km/h

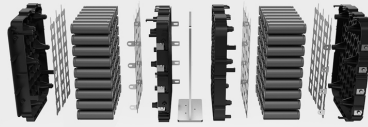

Maximum Range

130 km

Battery & Power

High capacity battery cell

Can be removed and charged at any time

Modular, portable lithium battery system allows for convenient removal and charging.

Battery Configuration

2 x 72V 20AH Lithium (Portable)

Battery Features

Portable, Removable, High-Capacity

Dimensions & Build

Special designed tail box

Born for delivery use

Equipped with a dedicated, lockable cargo box designed for secure delivery operations.

Dimensions

Configuration	Dimensions (L×W×H)
Without rear box	1860×800×1100mm
With rear box	1860×800×1175mm

Wheel Base

1480 mm

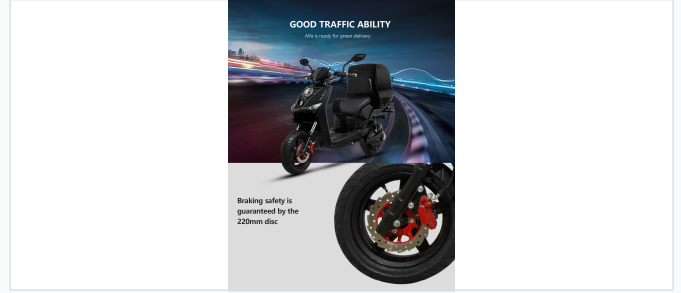

Tyre Specification

120-80-12 Tubeless

Safety & Equipment

Full LED lighting ensures enhanced visibility and security for night-time or low-light deliveries.

Reliable 220mm disc brakes provide superior stopping power and safety.

Braking System

- Front Disc Brake (220mm)
- Rear Disc Brake

Lighting System

All LED Lamps

Dashboard

Digital Display
