

# Urban Logistics Electric Van

This electric van is designed for urban logistics and transportation. It features a spacious cargo area and an all-electric powertrain for zero-emission operation.

## ADDITIONAL IMAGES

## Overview

### Urban Logistics Electric Van

This high-capacity electric van is engineered specifically for efficient urban logistics and last-mile delivery. Featuring a robust permanent magnet synchronous motor and a high-capacity lithium iron phosphate battery, it offers a substantial 433km range on a single charge. Its compact design, combined with a spacious cargo area, makes it an ideal solution for businesses aiming to optimize delivery routes while reducing their environmental footprint.

## Performance

### Key Performance Metrics

**433 km**

Range

**100 km/h**

Max Speed

**30 %**

Max Climb

## Vehicle Dimensions

### Weight Specifications

Metric	Value	Unit
Curb Weight	2940	kg
Payload	4360	kg
Gross Vehicle Weight	7300	kg

Overall Dimensions	5995 x 2100 x 3100 mm
Cargo Box Dimensions	4250 x 2050 x 2100 mm

## Powertrain

### Motor Specifications

- Type: Permanent magnet synchronous motor
- Rated Power: 60 kW
- Peak Power: 110 kW
- Rated Torque: 310 N.m
- Peak Torque: 1000 N.m

### Battery Specifications

- Type: Lithium iron phosphate
- Capacity: 106.95 kWh
- Voltage: 537.6 V

## Chassis and Handling

### Chassis Geometry

- Wheelbase: 3360 mm
- Front/Rear Wheel Distance: 1504/1525 mm
- Front/Rear Suspension: 1015/1620 mm

### Tire Configuration

7.00R16 8PR (Includes Spare Tire)

## Standard Configurations

### Included Features

Power Steering, Air Conditioning, ABS, Tubeless Tires
